Ethan Johnsrud

2414 Birn-Hill Dr. Faribault, MN 55021

ethanjohnsrud@gmail.com

1-507-412-3838

Objective:

To work in a greenhouse assisting in planting, transplanting, watering, and maintaining plants.

Related Experience:

For 4 years I have started my own plants from seed, raised the plants through transplanting stages; found in research and used heat, and planted them in the garden, maintaining them with watering and weeding until harvesting in the fall.

Computer Skills:

I understand Microsoft Office Programs and can research.

Accomplishments:

Achieved 4.0 GPA 1st Semester of High School.

Class Rank: 1/318

Scouts Rank: Life Scout; Working towards Eagle Rank
"A" Honor Roll through out Middle School

Education:

Faribault High School	9/3/13-Present
Faribault Middle School.....	2010-2013
Lincoln Elementary School, Faribault.....	2008-2010
WEM Elementary, Waterville.....	2003-2008

Interest & Activities:

Plants: Research and Planting

Pets: Frogs, Cat, Dog

Faribault High School Boys Swim Team

Boy scout Troop 9309

Faribault High School Band: Trumpet

Drama: Stage Crew and ran lighting

References:

Mrs. Gavin; FMS Science Teacher.....333-6347

Mr. Lombard; FMS Drama Director.....333-6391

2011 Tips

Gardening Tips

			Year 2011
Plant garden after last frost. If garden isn't in by 2 nd week of May, start peas & beans inside. Maybe early May.	Minimal watering mold is the thing that kills plants early on. <i>Mold=water, heat, insulation</i>	Lettuce plants start indoors <u>Not</u> under heat light or covered. Smaller pots evaporate quicker than larger pots.	Marigolds, Viola's, & Nurtstums are good flower's to start in green house early.
Make planting maps and Garden maps.	Hybrid seeds Won't Come true to type, but still will work/grow. <i>* means-next year won't get exact same tomato plant, will be a little different, not bad thing, can be good*</i>	Lettuce likes in kind of cold. <i>All</i> plants there need to be 3 or more plants to cross pollinate to create produce, flowers, & seeds. <i>-of same type of plant</i>	Sell plants in news paper pots. With plant tags. Use fan to sturdy stocks. Seeds need to be winterized when collected. Floating seeds don't sprout.

2012 Tips

Tips

Tips

<ul style="list-style-type: none"> When transplanting things water 2-3 times every 12 hours - don't water 11-12 times often will -dry 	<ul style="list-style-type: none"> When transplanting don't fill pot to top with water & soil at 72F - don't water until dry 	<ul style="list-style-type: none"> When plants sprout + dark - will be yellow - ok, but should come in sunlight + to burn graph in ground When seed in tray - keep in basement in shade, stay at 70°F most of time, but always between 77°F - 81°F basement @ 60°F Ferns behind heater keeps heat running when it's warm but is still cold, heat rises, but very slowly 	<ul style="list-style-type: none"> When transplanting don't fill pot to top with water & soil at 72F - don't water until dry When plants sprout + dark - will be yellow - ok, but should come in sunlight + to burn graph in ground When seed in tray - keep in basement in shade, stay at 70°F most of time, but always between 77°F - 81°F basement @ 60°F Ferns behind heater keeps heat running when it's warm but is still cold, heat rises, but very slowly
